

FOR THREE PIECE LOUVERS

In order to reduce shipping costs to you, some of the louvers have been designed to separate into three pieces. If you have a three piece louver, follow the “Three Piece Assembly” steps to assemble your louver into one piece.

THREE PIECE ASSEMBLY STEPS

1. Lay the louver upside down on a flat non-abrasive surface (i.e. a carpeted floor, the louver packing material or a piece of cardboard will do), placing the parts side by side, left center and right.
2. Line up the holes and then using a pair of vice grips clamp the parts together. Then insert the push plugs fully into the holes to hold the parts together.
